Mobile Layout

Colour Palette

#5c001c

Wine / Reddish-Brown: For main headers, certain section backgrounds, and the blockquote borders. Also for the main text against the primary background.

#5c001c

Soft Pink: For the primary body background and text on top of darker coloured sections

#ff9bbe

Pink: For main text (H2)

#c2003a

Deep Pink: For links and texts when the user hovers over or clicks them.

Typography

Font

| Times New Roman |

Font Weights: Standard regular weight (*400*) for body paragraphs, and **bold** (*700*) for headers and navigational titles

Font Sizes: Body text should be set around *15px*, section titles around *25px*, and main page headers around *30px*

Images

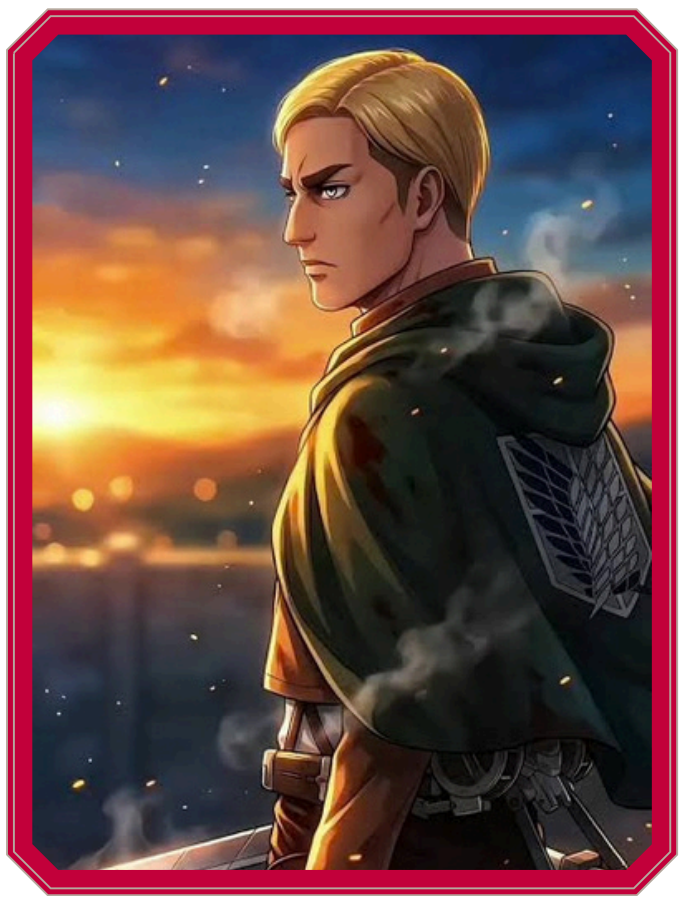

Student ID

For the first page
(professional section)

Photo of Inspirator

For the second page
(personality section)

Automatically scaled to ensure the photos fit cleanly on both mobile and desktop views without the breaking layout proportions.

Interface

Rounded article cards will be used to group content for readability.

Interactive Image Scaling for the ID and inspirator photos will feature a smooth transition effect using CSS. When the user's cursor hovers over the image, it must gently expand to draw focus, returning smoothly to its original dimensions when the cursor moves away.
